Brooklyn, NY

Experience

Sanctum Art

Lead Engineer

Brooklyn, NY

October 2025 - Present

Architected and led full-stack development of a React Native mobile application, building responsive UI, state-driven components, and API integrations while implementing native iOS features, OAuth auth, and secure backend systems to ship a production-ready digital wellbeing platform.

Candylabs

Lead Engineer

Brooklyn, New York

September 2024 - October 2025

Architected a React web platform for digital asset customization, building component-driven interfaces, scalable data models, and API-integrated features. Designed frontend architecture and backend services to support production deployment, performance, and extensibility.

PNY Technologies

Front End Developer

Parsippany, NJ (Remote)

November 2021 - July 2023

Developed and maintained public-facing and internal web platforms, including React-based applications and CMS-driven sites, implementing dynamic content systems, data visualizations, and integrated ecommerce features across multiple products and services.

Standard User

Front End Developer

Denton, TX

May 2021 - November 2021

Led frontend development of a React Native social platform, implementing responsive UI, geolocation services, and integrations with Google Maps and authentication APIs. Built messaging, community, and content systems while collaborating with backend engineers to deliver scalable application features.

Education

University of North Texas
